PRODUCT INTRODUCTION

Product Overview

The LM-S6026-24T2H is an advanced Layer 3 Managed Ethernet Switch engineered to meet the evolving needs of modern high-performance networks. Designed for next-generation enterprise networks, data centers, and metropolitan area networks (MANs),

it provides unmatched performance, scalability, and reliability to support the ever-growing demands of digital transformation, cloud computing, virtualization and intelligent applications.

This high-capacity switch supports multi-rate access at 1G/2.5G/5G/10G on its 24 Base-T ports and delivers flexible, ultra-fast uplink connectivity through 2 * 40G/100G QSFP28 ports. The powerful hardware architecture ensures non-blocking wire-speed forwarding making it ideal for both aggregation and core applications in data centers, campus networks and telecom infrastructures.

Powered by a robust Linux-based dual-stack (IPv4/IPv6) platform, the LM-S6026-24T2H integrates a complete suite of Layer 2 and Layer 3 features including VXLAN, OAM/APS, QoS, ACL and BGP/OSPF routing protocols ensuring seamless interconnection across multi-layer networks and diverse service environments. Its hardware-based NetFlow and high-precision clock synchronization capabilities make it perfectly suited for large-scale traffic analysis and timing-sensitive applications.

The switch supports elastic stacking technology allowing up to eight units to operate as one logical device through a single IP address. This simplifies network management, enhances reliability through redundancy and allows for flexible expansion without disrupting existing infrastructure. In case of device failure within the stack, traffic is automatically redirected, maintaining high network availability and stability.

Security is a cornerstone of the LM-S6026-24T2H design. It incorporates a comprehensive security framework including ACL-based filtering, ARP and DHCP attack protection, IP Source Guard, Radius and TACACS+ authentication, and 802.1X port-based access control. These mechanisms safeguard against internal and external threats, ensuring a secure and trusted network environment.

Product Overview

Compact yet powerful, it's designed to integrate effortlessly into standard 19-inch rack systems, making it ideal for enterprises seeking a balance between scalability, flexibility and performance. In summary, the LM-S6026-24T2H Layer 3 Managed Switch delivers superior performance, robust security, intelligent management and advanced scalability.
